§107-8. Well permit and approved well construction completion report requirements.

B. No zoning permit for a use requiring the construction of a well shall be issued for a property until such time as a well construction completion report has been approved by the Township.

§107-9. Location

All water supply wells shall have a source of supply that is from a water-bearing formation drawn not less than 35 feet below the ground surface. In addition, all wells and boreholes shall be located at a point free from flooding, at a higher elevation (wherever possible), and at the following minimum setback distances to existing or potential sources of pollution.

Minimum Setback (in feet) From:	Individual Potable Water Supply Wells	Closed Loop Geothermal System
Lakes, ponds, streams or other surface waters, delineated wetlands, and floodplains	25	10
Stormwater management facilities (detention and retention basins, stabilization ponds, etc.), but excluding storm drains	25	25
Stormwater management infiltration areas	50	25
Drainage ditches/swales	25	10
Individual potable water supply well	As required to meet current state law/regulation isolation standard	As required to meet current state law/regulation isolation standard
Community, public utility or municipal water authority water supply well	As required to meet current state law/regulation isolation standard	As required to meet current state law/regulation isolation standard
Public or on lot water lines	50	10 feet or according to easement
Preparation area or storage area of hazardous spray materials, fertilizers or chemicals, salt piles	100	100
Septic tanks, aerobic tanks or holding tanks	50	25
Subsurface sewage disposal systems, elevated sand mounds, other sewage disposal fields	100	25
Sewage seepage pits, cesspools	100	25
Farm silos, barnyards, privies and fuel tanks	100	25
Sewage spray irrigation sites, sewage sludge and septage disposal sites	100	25
Dedicated public right-of-way (ROW)	20	10 feet plus the difference between the existing ROW and the ultimate ROW determined by the current Township road classification schedule and ROW requirements set forth in the SALDO
Private roads	10	10
Property lines, driveways, and public sewer laterals	10	10
Building foundations and other structures (except for buildings enclosing water wells and/or water well pumps and any other source of pollution as approved)	20	10

§107-10. Well Construction

T. Well analysis. After well disinfection, collect and analyze water samples for nitrate-nitrogen and total coliform bacteria. The owner or his representative shall utilize the appropriate means and methods for sampling and stabilization, and obtain sample analysis from a certified lab. One copy of the analysis results shall be provided to the owner of the well and one copy provided to the Township.

It is the responsibility of the property owner to have the quality of their water checked for Total & Fecal Coliform as well as Nitrate/Nitrogen.

Well Certification and Recording Instructions

Within 7 days of drilling:

- Submit Well Completion Report to Township (If water well, also submit water analysis to both Township and Owner)
- Record site plan with the recorder of deeds (see instructions below)
- Return the receipt of recording to Township w/in 5 business days

Recording Site Plan:

Need the following items:

- Affidavit
- Site Plan
- Well Application form
- Recording fee
- Stamped, self-addressed envelope (addressed to Township)
- Return the receipt of recording to Township w/in 5 business days

Recorder of Deeds:

- Record all pages, Affidavit, Site Plan and Well Application form
- Record from owner to owner
- Record as a miscellaneous item
